

In accordance with the laws of Ukraine "On Alternative Energy Sources", "On the National Commission for State Regulation of Energy and Utilities" and the Procedure for Establishing, Revising and Terminating the "Green" Tariff for Electricity for Business Entities, Consumers of Electricity, Including Energy Cooperatives, and Private Households Whose Generating Plants Produce Electricity from Alternative Energy Sources Approved by the Resolution of the National Commission regulation in the spheres of energy and utilities, no. 1817 of August 30, 2019, the National Commission for State Regulation of Energy and Public Utilities,

NERC Resolution No. 2879 of December 31, 2020 "On Establishment of "Green" Tariffs for Electricity Produced by Generating Installations of Private Households"

01 January 2021:

1. "green" tariff for electricity generated from solar energy generating plants of private households, the installed capacity of which does not exceed 30 kW and which are put into operation:

**from 01 April 2013 to 31 December 2014 – 1228.06 kopecks/kWh (without VAT);
from 01 January 2015 to 30 June 2015 – 1104.51 kopecks/kWh (without VAT);
from 01 July 2015 to 31 December 2015 – 685.94 kopecks/kWh (without VAT);
from 01 January 2016 to 31 December 2016 – 650.91 kopecks/kWh (without VAT);
from 01 January 2017 to 31 December 2019 – 619.56 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 556.87 kopecks/kWh (excluding VAT)..**

2. "green" tariff for electricity generated from wind energy generating installations of private households, the installed capacity of which does not exceed 30 kW and which are put into operation:

from 01 July 2015 to 31 December 2019 – 398.29 kopecks/kWh (without VAT).

3. "green" tariff for electricity generated from solar energy generating plants of private households, the installed capacity of which does not exceed 50 kW, subject to their location on the roofs and/or facades of buildings and other capital structures, and which are put into operation:

from 01 January 2019 to 31 December 2019 – 619.56 kopecks/kWh (without VAT).

4. "green" tariff for electricity generated from wind energy generating installations of private households, the installed capacity of which does not exceed 50 kW and which are put into operation:

**from 01 January 2019 to 31 December 2019 – 398.29 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 357.72 kopecks/kWh (excluding VAT).**

5. "green" tariff for electricity generated from wind and solar energy on combined wind-solar generating systems of private households, the installed capacity of which does not exceed 50 kW and which are put into operation:

**from January 1, 2019 to December 31, 2019 – 560.55 kopecks/kWh (excluding VAT);
from January 1, 2020 to December 31, 2024 – 420.42 kopecks/kWh (excluding VAT).**

Resolution of the National Commission for State Regulation of Energy and Public Utilities of September 30, 2020 No. 1789 "On the establishment of "green" tariffs for electricity produced by generating installations of private households" is determined by the one that has expired,

The NEURC Resolution No. 2879 of December 31, 2020 enters into force on January 1, 2021, but not earlier than the day following the day of its publication on the official website

NERC Resolution No. 2878 of December 31, 2020 "On establishment of "green" tariffs for electricity produced by generating consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW" **sets from January 1, 2021:**

1. "green" tariff for electricity generated from solar energy generating installations of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW, subject to their location on the roofs and/or facades of buildings and other capital structures, and which are put into operation:
**from January 1, 2019 to December 31, 2019 – 560.55 kopecks/kWh (excluding VAT);
from January 1, 2020 to December 31, 2024 – 420.42 kopecks/kWh (excluding VAT).**
2. "green" tariff for electricity generated from wind energy generating installations of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from 01 January 2019 to 31 December 2019 – 398.29 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 357.72 kopecks/kWh (excluding VAT).**
3. "green" tariff for electric energy produced from biomass generating installations of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from 01 January 2019 to 31 December 2019 – 424.10 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 424.10 kopecks/kWh (excluding VAT).**
4. "green" tariff for electricity produced from biogas generating installations of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from 01 January 2019 to 31 December 2019 – 424.10 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 424.10 kopecks/kWh (excluding VAT).**
5. "green" tariff for electricity generated from wind and solar energy on combined wind-solar generating systems of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from January 1, 2019 to December 31, 2019 – 560.55 kopecks/kWh (excluding VAT);
from January 1, 2020 to December 31, 2024 – 420.42 kopecks/kWh (excluding VAT).**
6. "green" tariff for electricity generated from hydropower generating units of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from 01 January 2019 to 31 December 2019 – 597.43 kopecks/kWh (without VAT);
from 01 January 2020 to 31 December 2024 – 538.43 kopecks/kWh (without VAT).**
7. "green" tariff for electricity generated from geothermal energy generating units of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW and which are put into operation:
**from 01 January 2019 to 31 December 2019 – 514.46 kopecks/kWh (without VAT);
from January 1, 2020 to December 31, 2024 – 462.83 kopecks/kWh (excluding VAT).**

Resolution of the National Commission for State Regulation of Energy and Utilities of September 30, 2020 No. 1788 "On the establishment of "green" tariffs for electricity produced by generating installations of consumers, including energy cooperatives, the installed capacity of which does not exceed 150 kW" is determined by the one that has expired,

The NEURC Resolution No. 2878 of 31.12.2020 enters into force on January 1, 2021, but not earlier than the day following the day of its publication on the official website of the National Commission for State Regulation of Energy and Utilities: <https://www.nerc.gov.ua/?id=58071>
